The Training Catalogue is a gateway to a wide range of knowledge and skills that will empower Digital Innovation Hubs in the era of digital transformation. The approach to training is systematic, ensuring that you receive the utmost value from your learning journey.

Customized Training activities：

The Model behind these training activities, follows a structured path. it commences with the Implementation of Novel Roles and Occupations, strategically driving digital transformation. Then, conducts an extensive Needs Assessment, evaluating the existing knowledge and skills within partner organizations across all hierarchical levels. This assessment helps to pinpoint the precise skills required at each tier.

We further enrich DIH's learning experience with Interactive Workshops, which validate and enhance the insights gained from earlier stages. These workshops serve as a foundation for the introduction of customized training courses.

Sources:

These training resources are carefully curated, drawing from reputable sources such as Polimi's "PoK" Internal Portal, I4MS training catalog, Coursera, Udemy, Google courses, and others. They are provided for three levels: "Awareness," "Foundation," and "Extended Know-How," which match with Management, Professional, and Worker levels.

DIH's journey to success is ongoing, with continuous improvement facilitated by the DIH4AI Project. We commit to assessing our partners' progress and the project's impact on their capabilities.
